

Date:

Dear Patient/Parent/Family Caregiver,

The department of Child Health Evaluative Sciences at the Hospital for Sick Children is conducting a research study. You are being invited to participate because you live in Canada and are either aged 8-18 and living with chronic pain; or you are the parent or a sibling of a young person living with chronic pain.

The purpose of this study is to document the impacts of the COVID-19 pandemic on young people with chronic pain, their families, and their healthcare providers in Canada.

This study involves completing a one-time online survey using the link below. It will take about 45 minutes and will ask you questions about your thoughts on the COVID-19 pandemic, your health and overall quality of life.

If you would like to participate or find out more, please click the link below to read more about this research study.

Participation in any research study is voluntary. You do not have to participate in this research study if you/your child do/does not want to. You/your child's decision will not affect the care you/your child receives at SickKids. If you/your child decide to participate in this study you/your child can change your mind at any time without giving a reason.

Thank you for considering participation in this study

Sincerely,

Dr. Jennifer Stinson
The Hospital for Sick Children
